

Patent Application
Docket No. 27951/00023

#9
LST
2-27-98

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Patent Application of:

Billy G. Moon

Serial No.: 08/646,484

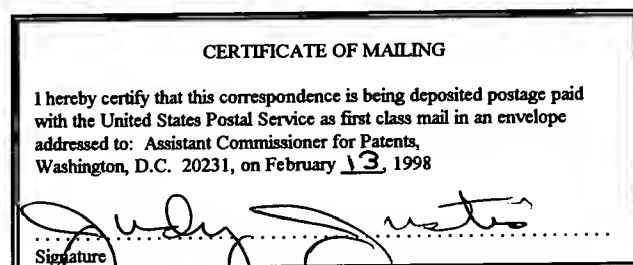

Filed: May 8, 1996

Examiner: E. Thlang

Group Art Unit: 2305

For: HALF DUPLEX UART CONTROL FOR SINGLE CHANNEL
BI-DIRECTIONAL WIRELESS COMMUNICATIONS

Assistant Commissioner
of Patents
Washington, D.C. 20231

Dear Sir:

RESPONSE TO THE ADVISORY ACTION

In response to the Advisory Action dated January 12, 1998, the Examiner indicated that the amendments to Claim 11 comprised newly added subject matter which would require further search. However, the Examiner provided no indication as to whether the amendments with respect to Claims 18 and 21 were given consideration. Applicant does not believe that these amendments would require a new search and respectfully submits that these amendments, along with the arguments made

with respect to the Hamilton reference in the previously filed amendment, sufficiently distinguish these claims over the art of record and respectfully requests a Notice of Allowance.

Respectfully submitted,

February 12, 1998
